Skills

Testing tools: Selenium WebDriver/RC, QTP, Appium, JUnit, TestNG, Firebug, Fire Path, Load Runner, JMeter.

Web Technologies: HTML, CSS, JavaScript, AngularJS, NodeJS, XML, XSLT, JDBC& REST services

Defect Tracking Tools: HP /Quality Center, JIRA

Build Tools: ANT, Maven.

Languages: Java, SQL, C#, C++, Python, VB.net, ASP.Net, .Net

CI/CD Tools: Jenkins, Hudson's.

Cross Browser Platform: AWS, SauceLab and Selenium GRID

Databases: Oracle, DB2&MongoDB

Version Control: Subversion, Team forge, GIT, GITHUB, Source Tree

Operating Systems: Windows XP/7/8, Mac OS, UNIX and Linux, Android

Work History

2025-04 - Current

Senior QA Engineer

Gen Digital Inc, Tempe, AZ

- Performed test execution and defect reporting, actively participating in defect resolution and retesting with Scrum and external teams.
- Developed test scenarios and test cases independently, ensuring comprehensive coverage of functional requirements.
- Designed and implemented robust automated tests for highly scalable, high-availability

applications using Selenium, JUnit, and TestNG.

- Automated testing of SOAP, REST, and GraphQL services using SOAPUI, ReadyAPI, Postman, and REST-Assured.
- Worked iteratively with Scrum teams to clarify requirements, define test automation needs, and provide feedback on design solutions.
- Created and managed test plans and deliverables, ensuring adherence to deadlines in a fast-paced Agile environment.
- Utilized Groovy scripting in SoapUI/ReadyAPI for service validation and automation.
- Integrated automation frameworks with CI/CD pipelines using Jenkins, TeamCity, Maven, and GitHub.
- Conducted testing across Windows, Mac, and Mobile platforms in real and virtual environments.
- Leveraged AWS and Azure cloud environments for testing and deployment activities.
- Applied strong SQL expertise for backend validation, focusing on Oracle and PostgreSQL databases.
- Performed Load Testing and Performance Testing using tools like JMeter and LoadRunner to ensure optimal application performance under stress.
- Demonstrated ownership and accountability for product quality, driving continuous improvement in testing processes.
- Integrated Jenkins with Git/GitHub for continuous integration and automated build deployments.
- Managed version control using Git and GitHub, including branching strategies, pull requests, and merge conflict resolution.
- Configured Git hooks for automated code quality checks and triggered CI/CD pipelines.
- Performed code reviews and collaborated with developers using GitHub for maintaining clean and efficient codebases.
- **Environment**: AWS, Java, JavaScript, Jenkins, Git, GitHub, POSTMAN, Android, Mobile, iOS, Cucumber, BDD, Agile, WebDriver, TestNG, Maven, Guidewire, JMeter, LoadRunner.

2023-01 – 2025-03

Software Development Engineer in Test (SDET)

Principal Healthcare, Des Moines, IA

- Involved in various meetings with Business analysts and developers
- Conducted Functional testing, Regression Testing using selenium with Data-driven framework and Key- Word driven framework
- Worked on Guidewire's Data hub and Info center solutions for Commercial Lines Transformation
- Worked on an End to End Guidewire Datahub/Info center implementation of Policy center for Business Owners Property
- Worked on Guidewire Policy Center to Datahub Data Conversion Effort for Business owners
- Created automation test scripts using data Driven framework and Page Factory model to test the web applications using Selenium WebDriver with JAVA and maven
- Expertise in using Selenium Grid to run test scripts on different platforms and against different browsers in parallel to save time
- Used Jenkins to execute the test scripts periodically on Selenium Grid for different platforms like desktop, tablet and mobile
- Performed Cross browser testing and Parallel testing on Chrome, Firefox and Safari using TestNG and Maven on Selenium grid
- Expertise in grouping of Test suites, Test cases and Test Methods for Regression and Functional Testing using TestNG Annotations like Groups, Parameter, Data Provider

- Utilized Maven to Manage dependencies for Test execution, plug-ins and created profiles of grouped Test cases to Run sanity and Regression Testing
- Involved in developing BDD Frame work from Scratch
- Involved in the usage of BDD framework to Develop Cucumber Step Definitions, Scenarios and Features using acceptance criteria
- Involved in DevOps Migration/automation processes for Build and Deploy systems
- Setting up Jenkins master, adding the necessary plugins and adding more slaves to support scalability and agility
- Planning and setting up of Continuous Integration for various properties on Jenkins with Commit, Component, Assembly, Deploy and Smoke jobs
- Experience setting up instances like Elastic Load Balancer in AWS for high availability
- Used AWS to deploy the project on EC2 instance
- Implementation of the Business logic layer for Services
- As Test Automation Engineer driving towards the quality and effectiveness of Digital

2020-09 - 2022-07

QA/ Selenium Automation Tester

Cognizant, India

- Analyzed the Business Requirements and Developed the Detail Test Plan and the Test Strategy
- Involved in resolving the Technical challenges& in efforts estimation and Test Planning
- Designed Manual and Automated Tests, created Automated test cases, test plans and executed tests using HP ALM, Selenium
- Involved in writing Automation scripts and executing scripts
- Created iOS and Android test frameworks based on APPIUM, Cucumber, and JavaScript
- Developed BDD and TDD script with Cucumber and written step definition using Gherkin based features
- Involved in Automation Feasibility Study for Web based applications
- Attended Financial Product training., discussed issues and interacting with customers
- Hands on experience with Swift Payment Method
- Configured Selenium, Testing, Maven tool and created selenium automation scripts in java
- Worked on distributed test automation execution on different environment as part of Continuous Integration Process using Selenium Grid and Jenkins
- Involved in designing and Developing Automated Functional Test suite using Selenium IDE and Web Driver
- Involved in Functionality, System, Integration, and Regression Test of Web based Reports
- **Environment**: Selenium, AWS, Maven, Jenkins, Devops, Appium, Android, Emulator, Rest Assured, REST, SOAP, XML, Quality Center 9.2, Soap UI, Cucumber, API Testing, QTP 10.0, Agile, Windows 7/XP, Oracle 11g

2019-06 - 2020-08

QA Engineer - SDET

Omega Healthcare, India

- Involved in QA Docs (Test Plan, Scenarios, RTM, Test Case Design), Peer Reviews, Test
- Designed & Implemented a Hybrid Test Automation Framework using Selenium WebDriver
- Performed GUI functional testing manually for the application
- Expertise in Test Plan creation, Test Case Design, Test case Review, Test Case Execution, Writing Test scripts, testing tools Usage, Defect management, and Prepare Test reports
- Configured Selenium Web Driver, TestNG, Maven tool and created Selenium automation scripts in java using Testing prior to next quarter release
- Created and maintained automated test script for API testing using Restful
- Performed API Level testing for web services, enhanced the Test harness and developed many Test suites using XML
- XML / SOAP using Soap UI and Postman tool
- Reviewed database test cases according to assigned Requirements to validate reports by retrieving data with complex SQL queries from SQL Server

- Designed data-driven testing in Selenium and captured data dynamically from web controls
- Performed Functional, System and Regression Testing on web and mobile applications at various phases of the Project life Cycle
- Actively involved in STLC process and used tools like Selenium RC/Web driver, JMeter, SOAP UI
- Setup /Installed and Configured Selenium IDE
- Used Selenium WebDriver API to automate tests
- Perform browser compatibility testing of application under various cross browsers (Safari, Firefox, IE, Chrome) using HTML IDs and XPATH in Selenium WebDriver
- Involved in implementing logging and tracking using Jira
- Contributed to successful product launches through meticulous end-to-end testing of applications.
- Collaborated with developers to identify and resolve software issues, leading to higher product reliability.
- **Environment**: Java, .Net, JIRA, Jenkins, ALM, SOA Tester, Eclipse, Junit, Load Runner, Cucumber, HTML5, CSS, JBOSS, Oracle, Maven, JMeter, SVN, Node.JS, Selenium Grid, TestNG, Selenium WebDriver

Education

Bachelor of Technology: Computer Science

Vignan University - India

Master of Science: Computer Science

Northern Illinois University - DeKalb, IL
